

MEET PATEL

Binghamton, NY | (570) 770-1348 | mpatel25@binghamton.edu | www.linkedin.com/in/meetpatel-tech | github.com/meet0-0

EDUCATION

Binghamton University, State University of New York, Thomas J. Watson College of Engineering and Applied Science

Masters in Computer Engineering

Expected May 2028

Bachelor of Science in Computer Engineering

Expected May 2027

Relevant Coursework: Digital System Design, Signals and System, Computer Communication and Networks

Nirma University, Institute of International Studies | Ahmedabad, Gujarat

Transfer Coursework in Bachelor of Science in Computer Science and Engineering

May 2025

Relevant Coursework: Data Structures, Operating System, Computer Architecture

TECHNICAL SKILLS

Languages: C, C++, VHDL, Python, Java

Operating Systems: Linux, Windows

Software: Microsoft Office Suite, VS Code, Vivado, Xilinx ISE, Github, KiCAD, PSpice, Fusion 360

Certifications: Oracle Cloud Infrastructure 2025 Certified AI Foundation Associate, Google Data Analytics

PROJECT EXPERIENCE

FIFA World Cup Prediction Model | Independent Project

April 2026

- Implemented a complete machine learning pipeline for forecasting results in international football matches using the Gradient Boosting technique with time-series cross-validation
- Designed a ranking mechanism for finding strong teams, upsets, and underdogs from the model scores
- Generated a visual representation using the Matplotlib library

Pomodoro Timer on Basys Board | Independent Project

January 2026

- Designed an FPGA-based Pomodoro timer in VHDL with real-time MM:SS countdown for work (62:59 - 00:00) and break (14:59 - 00:00) on a 4-digit multiplexed 7-segment display
- Implemented a multi-state FSM to handle start, pause, reset, and work/break switching with deterministic timing behavior
- Integrated clock division and debounced inputs to ensure stable operation and eliminate false triggering during user interaction on the Basys 3

Traffic Lights Controller with Pedestrian Crossing | Independent Project

January 2026

- Built a real-time FPGA-based traffic controller simulating vehicle and pedestrian flow using FSM-driven state transitions
- Implemented clock dividers, debouncing, and request-latching logic to reliably process asynchronous pedestrian inputs
- Verified correct behavior under concurrent requests through simulation and on-board testing, ensuring deterministic timing and safe transitions

FPGA Digital Stopwatch | Independent Project

December 2025

- Developed a fully synchronous digital stopwatch in VHDL with start/stop/reset control and real-time display
- Implemented BCD counters and clock dividers to maintain precise timekeeping with ± 0.01 s accuracy
- Validated functionality using timing analysis, edge-case testing, and iterative FPGA debugging

LEADERSHIP AND INVOLVEMENT EXPERIENCE

Bose-McIntosh Summer Hardware Analyst | Intern

May 2026 – July 2026

- Developed a live dashboard to identify high-failure electrical components during testing and manufacturing.
- Analyzed electrical test data to identify material waste and recommend process improvements.
- Standardized electrical test data and enabled real-time database updates for accurate reporting.

Watson Combat Robot League | Team Leader

January 2026 – May 2026

- Designing and building a combat robot, adding motor control, and embedded systems to compete in head-to-head matches
- Programming and testing control systems for real-time maneuverability and weapon actuation under competitive constraints
- Conducting iterative prototyping and failure analysis to improve durability, power efficiency, and combat performance

EkochingMUN, Director General / Head of Graphics

January 2024 – June 2025

- Led the execution of a 450+ delegate international conference, managing timelines, logistics, and multi-team coordination
- Managed cross-functional teams under fixed deadlines and resource constraints
- Oversaw end-to-end event execution, ensuring smooth operations and issue resolution

WORK EXPERIENCE

Orientation Summer Staff, Student Assistant | Binghamton, New York

June 2026 - August 2026

University Tour Guide, Student Assistant | Binghamton, New York

March 2026 - July 2026

University Event Security, Student Assistant | Binghamton, New York

September 2025 - Present
